

How is that Done?

The following are some articles, to be added to over time, that show how various things are done on the Ensign, from routine items like mast stepping and unstepping that are done twice a year, to restoration and enhancement projects that we'll hopefully be able to publish from time to time.

1. How is the mast [Ensign Stepped](#)?
2. What does the [mooring.gear](#) look like?
3. How do I [restore an Ensign](#)? (We add to this from time to time so check back occasionally. Also check out our [Ensign Projects](#) page.)
4. How do I fly a [Ensign Spinnaker](#)?

[Contact us](#) if you'd like to learn more about Ensign sailing.
