Yearbook: the office will begin work in March. Discussion of going all digital with a suggestion that the fleets poll their members and discuss at the annual meeting at the Jr. Nationals.

Chief Measurer's Report: Eric Heim reported that no new boats had been measured. SWYC and CYC have club boats without numbers – which will be assigned shortly.

Mast/Boom Supply:

Rock West Composites

- Boom prototypes are in hand with Sailing Supply, Bedford, and myself for testing
- Mast Prototypes expected in approximately 3 months
- They will be a different look than we are used to, but I had a visit with the engineering department and expect a quality product at a relatively affordable price

Gresham Marine

Has 3 proto masts in hand. Very close to old specs. Expects to have an inventory of approximately 20 masts in 30 days. Cost to be \$900+

Bedford Boats

Has proto mast and working with a 3rd supplier. Basically identical to the Skypole we had used in the past (may even be same tooling). Not sure what he is planning for inventory as he does not have any current boats on order. Cost expected to be just under \$1000

National Measurement

Sr Nationals will be day before only at venue (Friday).

I will need extra help this year (particularly at the Newport/ Long Beach days) for the Jr Nationals as I will be away on Transpac for much of early-mid July. Have Matt Beattie and Mike Bartel lined up but could use one more.
